Profile

- A highly skilled and experienced full stack developer with expertise in developing robust and scalable web applications.
- Proficient in both front-end and back-end development, with a passion for creating elegant solutions that enhance user experience.
- Strong communication, collaboration, and adaptability skills, allowing for seamless teamwork and effective problem-solving

Professional Experience

Software Engineer, *Namecheap* ⧉
11/2020 – 09/2022
Phoenix, Arizona, United States

- Created and led the development of a new internal cloud deployment system.
- Built REST applications and services in Express.
- Provided support and guidance for implementing REST services.
- Was a resident expert on taking a web app/service project from start to deployment all the while using the company's best practices.

Software Engineer, *Thumbtack* ⧉
06/2019 – 10/2020
San Francisco, California, United States

- Developed and maintained the world's leading language learning software.
- Worked on desktop, web, and mobile products.

- Developed the front-end and back-end of language-content creation and editing tools.
- Built the requirements, designs, and did the implementation in React, Angular and Express.js.
- Modernized the CI, dependency management, and build scripting with Maven, Ivy, Rake, Nexus, and Jenkins.
- Led the effort to radically improve the reliability of our major K12 educational product.

Software Engineer, *Couchsurfing* ⧉
07/2018 – 03/2019
San Francisco, California, United States

- Developed tools for the simulation of network security for a federal grant project.
- Wrote the front-end and back-end in JavaScript and SQL.

- Led a team of two developers plus several undergraduate students.
- Established the workflow management, source control, and continuous integration.

Projects

Parent Zone, *React.js | Node.js* ⍐
ParentZone is a mobile app & website that enables parents to stay up to date with their children's activities and achievements. I worked as a full stack developer on this project and contributed to the both frontend and backend side.

NowMeta, *React.js | Web3 | Solidity* ⍐
NowMeta is a Metaverse platform based on BSC that enables users to create and customize their own virtual reality (VR) and augmented reality (AR) experiences without requiring coding skills or specialized software.
I worked on this project as a frontend | blockchain developer to implement smart contract and interface for NowMeta DAO.

Exposure Analytics, *Wordpress* ⍐
From measuring the movement of thousands to capturing the engagement of each person who visits your event, Exposure Analytics provides you with all the data you need to measure the impact of your event.

Mri Software, *React.js | Laravel* ⍐
MRI Software is a leading provider of innovative real estate software applications and hosted solutions.

Barkani, *PEAN Stack* ⍐
At Barkani, we look forward to customer engagement including a robust healthcare education component, fully integrated with all other Barkani services and products. I worked on this project as a frontend | backend developer.

Speakers' Bureau, *PHP* ⍐
Speakers' Bureau has all of the information and resources that Lundbeck Account Managers need to schedule a Speaker Meeting and also includes the information a speaker will need as a member of the community.

HealthBookPlus, *Wordpress | React-native | Djagno* ⍐
HealthBook+ is a simple-to-use digital-first care platform that guides an individual's next best health action using advanced AI while keeping their data private and secure.
I developed web and mobile apps as a frontend developer

Education

Master of Computer Science, *James Madison University*

2015 – 2018
Harrisonburg, Virginia,
United States

Master of Engineering, *Duke University*

2014 – 2015
Durham, North
Carolina, United States

Bachelor of Engineering, *University of Chicago*

2011 – 2014
Chicago, Illinois,
United States
